AGRIBON+ AG-15 Insect Barrier

- Unroll and place directly over transplants or planted seeds for “floating” installation or over #9 Support Wire, Hoop Loops, or Quick Hoops™ to create a low tunnel environment.
- To anchor, secure with Snap Clamps, Row Cover Hand Pegs, sand bags, or dig a furrow along each side and cover the fabric edges with soil.
- To ensure proper pollination, it is advisable to remove insect barrier when plant blossoms open.
