Required For Assembly (Not Included)
- Phillips-head Screwdriver

Assembling the Twine Knotter

ASSEMBLY INSTRUCTIONS

1. Slide Twine Knotter Head over Wood Handle. Tap lightly to make sure the Twine Knotter Head is completely on the handle.
2. Insert the #8 x ¾" screw using a Phillips-head screwdriver.

OPERATION & USE

1. Position twine into slot. ***(Figure 1)***

Figure 1

2. Wrap twine clockwise around the post three times if you are using a natural fiber twine, six times if you are using synthetic twine**.** (***Figure 2***)

3. Wrap the twine around the loop and back across existing twine and bring twine down and hold taught alongside the handle. ***(Figure 3)***

Figure 3

4. Push the curved arm up firmly into your trellis wire or pipe **(*Figure 4)*** until the notch of the Twine Knotter is firmly against your trellis wire or pipe. (***Figure 5)***

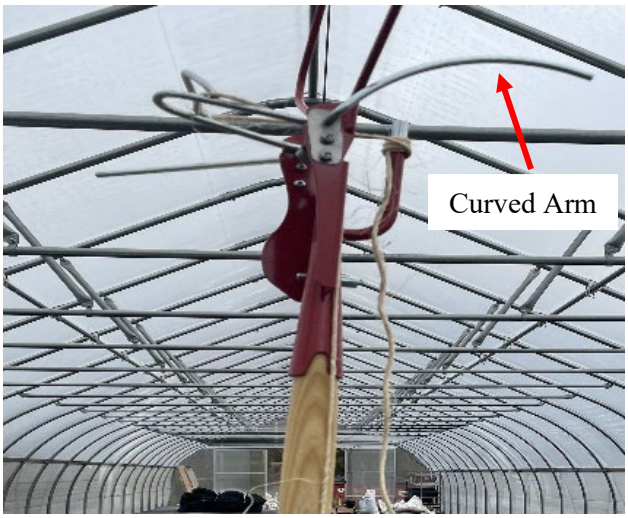

Figure 4

5. Pull down handle and twine simultaneously to tie the knot.

6. To release the knot at the end of the season, pull down the loose end of the twine located up near your trellis wire or pipe. ***(Figure 6)***
